

Avery Dennison Company Profile

2023

Our Story

Ray Stanton (“Stan”)

Avery invented the world’s first self-adhesive label as a way to merchandise objects.

In 1935, he founded Avery Adhesives in downtown Los Angeles and, in 1990, the company merged with Dennison Manufacturing to form Avery Dennison.

Over the past 88 years, we have grown from one bright idea into a global Fortune 500® corporation that continues to advance quality and innovation in materials science and digital identification solutions.

Who We Are

Avery Dennison is a global materials science and digital identification solutions company that provides branding and information labeling solutions and functional materials for home and personal care, apparel, e-commerce, logistics, food and grocery, pharmaceuticals and automotive industries.

Use of Non-GAAP Financial Measures

This presentation contains certain non-GAAP financial measures as defined by SEC rules. We report our financial results in conformity with accounting principles generally accepted in the United States of America, or GAAP, and also communicate with investors using certain non-GAAP financial measures. These non-GAAP financial measures are not in accordance with, nor are they a substitute for or superior to, the comparable GAAP financial measures. These non-GAAP financial measures are intended to supplement the presentation of our financial results prepared in accordance with GAAP. Based on feedback from investors and financial analysts, we believe that the supplemental non-GAAP financial measures we provide are useful to their assessments of our performance and operating trends, as well as liquidity.

Our non-GAAP financial measures exclude the impact of certain events, activities or strategic decisions. The accounting effects of these events, activities or decisions, which are included in the GAAP financial measures, may make it more difficult to assess our underlying performance in a single period. By excluding the accounting effects, positive or negative, of certain items (e.g., restructuring charges, outcomes of certain legal proceedings, certain effects of strategic transactions and related costs, losses from debt extinguishments, gains or losses from curtailment or settlement of pension obligations, gains or losses on sales of certain assets, gains or losses on venture investments and other items), we believe that we are providing meaningful supplemental information that facilitates an understanding of our core operating results and liquidity measures. While some of the items we exclude from GAAP financial measures recur, they tend to be disparate in amount, frequency or timing.

We use these non-GAAP financial measures internally to evaluate trends in our underlying performance, as well as to facilitate comparison to the results of competitors for quarters and year-to-date periods, as applicable.

We use the non-GAAP financial measures described below in this presentation.

- **Sales change ex. currency** refers to the increase or decrease in net sales, excluding the estimated impact of foreign currency translation and the reclassification of sales between segments, and, where applicable, an extra week in our fiscal year and the calendar shift resulting from the extra week in the prior fiscal year, and currency adjustment for transitional reporting of highly inflationary economies. The estimated impact of foreign currency translation is calculated on a constant currency basis, with prior period results translated at current period average exchange rates to exclude the effect of currency fluctuations.
- **Organic sales change** refers to sales change ex. currency, excluding the estimated impact of acquisitions and product line divestitures.

We believe that sales change ex. currency and organic sales change assist investors in evaluating the sales change from the ongoing activities of our businesses and enhance their ability to evaluate our results from period to period.

We believe that the following measures assist investors in understanding our core operating trends and comparing our results with those of our competitors.

- **Adjusted operating income** refers to income before taxes; interest expense; other non-operating expense (income), net; and other expense (income), net.
- **Adjusted EBITDA** refers to adjusted operating income before depreciation and amortization.
- **Adjusted operating margin** refers to adjusted operating income as a percentage of net sales.
- **Adjusted EBITDA margin** refers to adjusted EBITDA as a percentage of net sales.

We believe that adjusted operating margin and adjusted EBITDA margin assist investors in understanding our core operating trends and comparing our results with those of our competitors.
